

RJ45 Boots is a simple and convenient way to protect the place of the cable connector attachment. The design of the caps allows to observe proper cable bend radius, which greatly extends the service life of connectors. NIKOMAX boots have a unique form factor which don't increase the size of connectors. This allows to use them with any patch panel, including models with high port density. Functionally and visually caps in no way inferior to the factory applied caps. Shells made of high quality plastic in transparent color, perfectly match with cables in different colors and shades. Boots are also equipped with protection of locks, latches increases the durability and usability.

### Ordering Table

P/N	Diameter	Individual package			Freight package		
		Quantity	Volume, m3	Weight, kg	Quantity	Dimensions, mm	Weight, kg
NMC-RJBOOT55B5.5 mm		100 pcs.	0.000406	0.140	100 pack.	490x370x280	15.5
NMC-RJBOOT65B6.5 mm		100 pcs.	0.000406	0.140	100 pack.	490x370x280	12.5

**Detailed characteristics**

Characteristic	Value
Temperature ranges	Storage from -40 to +70 ° C. Installation from -10 to +50 ° C. Operation from -30 to +80 ° C
Warranty	1 year
Connector type	RJ45
Protection level	Transparent
Packaging	Plastic bag of 100 pcs.
Diameter of the hole for the cable	5.5 mm (For Cat. 5e UTP / STP) / 6.5 mm (For Cat. 6 UTP / STP)
Materials	Polyvinyl chloride (PVC)
