

NMC-RP50UC3-1U-BK

Telephone patch panel, 50 ports, 19 ", 1U, category 3

Patch panels (patch panels) are designed for mounting cables in various subsystems of the SCS and connecting the individual network components to each other using patch cords.

The NIKOMAX NMC-RP50UC3-1U-BK telephone patch panel is designed for mounting in a 19 "cabinet or rack. With a standard height of 1U, the panel holds 50 Category 3 RJ45 / 8P6C ports, which saves considerable space inside the cabinet.

Unlike most telephone panels, the NMC-RP50UC3-1U-BK supports three-pair operation, which is necessary for the operation of certain types of digital PBXs. For ease of administration, all ports are numbered, and there are additional marking sites.

The patch panel is made in the classic black color. Universal IDC contacts 110 / KRONE are located on the back side of the panel, on a horizontal substrate. This design makes it much more convenient to distribute multi-pair cables. The patch panel is made according to the USOC standard. For fixing the cables has a built-in organizer.
