

NMC-TED300

Cable tester with LCD display, with length measurement function

The NIKOMAX NMC-TED300 cable tester with LCD display is designed to work with twisted-pair cables terminated with RJ45 connectors. The tester is able to diagnose such line errors as a violation of the wiring layout of the conductors, breakage of conductors and short circuits, as well as measure the length of the cable line. The tester has several calibration parameters storage cells for working with cables of different manufacturers and categories.

Ordering Table

P/N	Description	Individual package	Volume, m3	Weight, kg
		Dimensions, mm		
NMC-TED300	UTP / STP LAN tester with LCD display	135 x 265 x 80	0.0028	0.503

## Detailed characteristics

Characteristic	Value
Warranty	1 year
Protection level	The main and remote module is gray
Housing material	Plastic
Packaging	Cardboard box
Temperature range	Storage from - 10 C to + 60 C, operation from - 10 C to + 60 C
Connectors on the device	2 x RJ45 (main and scan)
Line testing for breaks and short-circuits	Yes
Checking for correct wiring	Yes
Shielding integrity check	Yes
Battery	4 batteries 1.5V "AA" type (not included)
Type of cable	LAN UTP / STP
The choice of units of length	Yes, meters / feet / yards
Setting screen auto-off	Yes
Cable length measurement	Yes, up to 1000 meters
Calibration	Yes, storage up to 3 values
Setting the auto-off tester	Yes, 15 / 30 / 60 / 120 minutes
Intercom system	Yes
Maximum length of tested lines	1000 m
