NMC-WP12-BLANK-BK

12 ports wall mounted patch panel, snap-in type, unshielded, black

Page 1 of 2

Patch panels are designed for cutting cables of various SCS subsystems in them and connecting individual network components to each other with patch cords. The NMC-WP12-BLANK-BK wall-mounted patch panel is unshielded and can accommodate up to 12 Keystone modules. The case of the wall panel consists of two parts: a base, which is mounted on the wall and a front part with seats for Keystone format modules. A feature of this panel are rotating sections for installing modules. Swivel angle up to 27 °. The modular design is very convenient and, if necessary, allows you to flexibly combine connectors of different types and categories. For ease of administration, all panel ports are numbered.

Ordering Table

P/N	Type of module installation	Number of ports	Individual package	
			Dimensions, mm	Weight, kg
NMC-WP12-BLANK-BK	Keystone	12	0.002525	0.180

Detailed characteristics

Characteristic	Value
Warranty	1 year
Number of ports	12
Marking	Numbered Ports
Protection level	Black
Packaging	Individual - cardboard box
Type of installed modules	UTP Keystone (no wider than 17 mm)
Temperature range	Storage from -40 to +70 ° C. Installation from 0 to +50 ° C. Operation from -10 to +60 ° C
Mounting plinths	Wall
Additional features	Modules rotation. Swing angle up to 27 °
Material	High strength, non-combustible ABS Plastic, UL94V-0 compliant
Execution	Unshielded
Dimensions (LxWxH), mm	71 x 254 x 84
