

NMF-WO2-BLANK-CP-WT

Optical fiber surface mount box

Optical wall sockets are designed to pull the cable out of the wall and connect various terminal equipment to it. It can also be used as a small wall cross. The case of the outlet is made of high quality white. Inside there is a place for laying the cable and two seats for single SC or dual LC adapters. The cable is inserted through a hole in the bottom of the outlet, or one of the connectors.
